Start here

These are the first three sessions of the 4-Week Home Workout Plan.

Do 3 sessions a week, on any days. Rest a day between if you can.

Print and tape today's session page up. Clear space; use a stable support where pictured.

Warm up, follow the moves in order for the rounds shown, then cool down. Rest about 20 s between moves and about 1 minute between rounds.

Time estimates assume about 3 seconds per rep (each side counted), holds as written, about 20 seconds to get to the next move and 1 minute of rest between rounds.

Missed a day? Do the next session on the list when you can. Nothing is lost.

If a move hurts, stop it. Try its easier option, or leave it out today.

Before you begin

Check with your doctor before you start a new exercise plan. Stop if anything hurts; never push through pain. These pages are general exercise guidance, not medical advice.

Count each side separately. For a hold, stay in the Finish picture; keep-moving moves alternate between the pictures.

There is no video and no coach. You read the move, do it and take the time you need. If you would rather press play and follow a class, a video service will suit you better.

Instant digital download, nothing ships.

One-time purchase: no subscription, no app, no account.
